PLEASE READ THIS MANUAL CAREFULLY
BEFORE USING THE MACHINE**

DIRECTORY

A. PART NAME.....	1
B. OPERATION INSTRUCTION.....	2
C. CAUTION.....	2
D.TROUBLE SHOOTING.....	4
E.CLEANING.....	4

3. **Sanitizing**

The machine should be disinfected with the disinfectant separately bought from drugstore or marketplace according to the instruction manual of the disinfectant and then clean it with water(see **cleaning and draining instruction**). Generally this should be done every three months.

4. **To Remove Mineral Deposits:**

Mix 4 liters water with 200g citric acid crystals, inject into the machine and make sure the water can flow out of the hot water tap. Switch on the power and heat it about 10 minutes, 30 minutes later, drain off the liquor and clean it with water for two or three times. Generally this should be done every six months.
Never disassemble this machine by yourself to avoid danger from damaged machine.

D: TROUBLE SHOOTING

Please check the follows before having the machine repaired.

PROBLEMS	no water	no water running out from taps	leakage from bottle supporter	noisy operation
POSSIBLE CAUSES	1. over consumption of hot or cold water in short time 2. no power supply	1.empty bottle 2.inlet of bottle supporter blocked by bottle seal	broken bottle	not placid installation
ELIMINATION	1. just wait a moment, then hot or cold water is available again. 2. connect plug to socket, turn on the heating or cooling switch.	1.replace it with another one 2.clean out wasted paper & bottle seal, install bottle again.	replace it with a new bottle	place the machine on placid & solid surface

E: CLEANING

To avoid accident, cut off the power supply before operation according to the following instruction.

- The machine had been disinfected before departed from factory. Cleaning the dispenser prior to installing a full bottle of water for the first time.
- Cleaning and draining instruction:**
 - Before cleaning, make sure the power switch in the *O(off)* position and unplug the water dispenser.
 - Vertically insert the bottle into the supporter on top of the machine.
 - Open the taps, let about 1 liter water flows into a container.
 - Removed the water bottle from the dispenser.
 - Place a large bucket beneath the drain outlet. Remove the drain cover and allow water to drain.
 - After draining, replace the drain cover and you can use the machine.
Attention: The dispenser heats water to a temperature of approximately 87°C. It can cause severe scalded. Please operation it carefully.

A. PART NAME

NO.	PART NAME	NO.	PART NAME
